Human Resources Division — Behavioral Science & Workforce Optimization Sector

Title:	G.O.A.T. Exam Administration & Psychological Profiling Guidelines
Date:	June 2076
Department:	Human Resources
Intended Format:	PDF
Classification:	HR RESTRICTED — NOT FOR GENERAL EMPLOYEE DISTRIBUTION
Document ID:	VT-HR-GOAT-076-06
Revision:	4.2 (Final)
Approved By:	Director Winifred Gable-Pruett, Division of Human Asset Calibration

ADMINISTRATOR'S FOREWORD

Congratulations, HR Administrator! If you are reading this document, you have been granted Tier-4 clearance and are therefore **one of only eleven individuals in this vault** who understands the true, swell nature of the Generalized Occupational Aptitude Test (G.O.A.T.). We know you'll find the following guidelines not only practical, but downright *inspiring*! The G.O.A.T. program represents Vault-Tec's most peachy achievement in Workforce Optimization: a scientifically rigorous, statistically validated, and completely **pre-determined** occupational assignment framework. Hip hip, hooray for efficiency!

Please ensure this document is stored in the HR-locked filing cabinet (Cabinet 7-B, Sub-Level 3) at all times. Any General Employee found in possession of this document is to be immediately referred to the 'Problematic Resident Reassignment' protocol per Form 19-C. Let's keep things tip-top, shall we?

SECTION 1: PURPOSE AND DESIGN PHILOSOPHY

The G.O.A.T. was developed by Vault-Tec's Institute of Behavioral Workforce Modeling (IBWM) to provide each vault resident with a **personalized occupational destiny**. Residents are informed that their test results reflect a sophisticated psychometric analysis of their cognitive aptitudes, interpersonal competencies, and manual dexterity potential.

They are not informed that occupational assignments are, in fact, determined **no fewer than eighteen (18) months prior to test administration**, based entirely on the staffing requirements of the Vault-Tec Social Stratification Model (VTSSM v3.1). The exam itself is a *delightful* theatrical exercise designed to maximize resident buy-in and minimize labor grievances. Studies show that residents who believe they "earned" their assignment demonstrate a 34% reduction in what we at Vault-Tec cheerfully call "Unauthorized Dissatisfaction Events" (UDEs). Swell stuff!

SECTION 2: PRE-ASSIGNMENT PROTOCOL (Completed BEFORE Exam Day)

The following workflow **MUST** be completed prior to any G.O.A.T. exam administration. Do not deviate from this checklist — it is audit-compliant and legally binding under Vault-Tec Corporate Charter Article 9, Sub-Clause F ('The Illusion of Meritocracy in Closed Populations').

Step	Action	Responsible Party	Form
1	Consult the Vault Staffing Needs Assessment (VSNA) to identify required role headcounts.	Operations Office	Form VSNA-01
2	Cross-reference resident roster against VTSSMR and Social Utility Index (SUX) scores. Assign roles accordingly.	MR & Social Utility	Form SUX-77
3	Submit finalized assignment manifest to Vault-Tec Central Records (encrypted holotape, triplicate).	HR & Central Records	Form 22-A (x3)
4	Generate individualized 'G.O.A.T. Result Packets' and deliver each resident to their pre-assigned role.	HR & Charging Staff	Auto-generated
5	Seal result packets and store in Vault-Tec Certified Tamper-Evident envelopes. Label cheerfully.	HR & Tamper-Evident	N/A

SECTION 3: EXAM DAY ADMINISTRATION GUIDELINES

On exam day, the G.O.A.T. is to be administered with maximum theatrical flair. We cannot stress this enough: **the exam must appear rigorous**. Residents who feel they have been "tested" report dramatically higher levels of post-assignment contentment, which correlates with a 12% uptick in productivity metrics and a statistically significant decrease in what our sociologists call 'Tunnel Wall Graffiti Incidents.' Let's keep those numbers peachy!

Exam Administration Best Practices:

- 3.1** Distribute exam booklets with an air of grave seriousness. Encourage residents to 'take their time' and 'really reflect.' Suggested phrase: *"Your future is in YOUR hands today, champ!"*
- 3.2** The exam itself contains 60 questions. Questions are genuine psychometric items sourced from the 1958 Vault-Tec Personality Battery. **However, answers are not scored.** Answer sheets are to be collected, bundled, and incinerated in the Sub-Level 2 furnace (Requisition Code: GOAT-BURN-076).
- 3.3** Following a wait period of no less than 72 hours (to simulate 'processing time'), pre-sealed result packets are to be distributed. Administer with warm congratulations and a complimentary Vault-Tec branded pen.
- 3.4** Should a resident verbally contest their assigned role, HR staff are to respond with Scripted Deflection Phrase Set C: *"The G.O.A.T. is a highly sophisticated instrument, and we are fully confident it has identified your highest potential!"* Do not engage further.
- 3.5** In the event a resident demands a re-test, administer Form 88-D ('Request for Occupational Re-Evaluation'). Route all completed Form 88-Ds directly to File Cabinet 7-B, Sub-Level 3 (the incinerator adjacent cabinet). Do not process.

SECTION 4: THE OFFICIAL G.O.A.T. GRADING RUBRIC

The following table represents the **actual** criteria used to assign occupational roles. This rubric supersedes all G.O.A.T. exam scores, which, as noted in Section 3.2, do not exist in any meaningful sense. The rubric is derived entirely from the Vault Staffing Needs Assessment and the Social Utility Index. Isn't that just the bee's knees?

Assignment Category	Primary Determinant	Secondary Determinant	Example Roles
Tier 1: Leadership (Pre-assigned to Overseer's family)	Familial relation to current Overseer	N/A	Junior Overseer, Deputy Administrator
Tier 2: Technical (Pre-assigned to quota)	VTSSM Engineering SUX Score ≥ 72	No documented 'Grievance Events'	Reactor Technician, Water Chip Engineer
Tier 3: Medical (Pre-assigned to quota)	VTSSM Medical SUX Score ≥ 65	Resident demonstrated 'pleasant bedside manner'*	Physician, Nurse, Mortuary Technician
Tier 4: Agricultural (Pre-assigned to quota)	VTSSM General SUX Score < 50	No distinguishing alternate criteria	Hydroponics Laborer, Fungal Crop Tender
Tier 5: Custodial (Catch-all assignment)	Lowest 15% of overall SUX scores	History of UDEs or behavioral flags	Waste Processing, Sewer Maintenance
Tier 6: Experimental (See Doc 5 for details)	Flagged as 'Problematic' by Overseer's Office	See HR Form 19-C	CLASSIFIED

* 'Pleasant bedside manner' is assessed by the HR Administrator on a purely subjective basis during the resident's Vault Intake Psychological Screening. There is no standardized definition. Trust your gut! If they seem like a peach, they get the scalpel. If they seem surly, they get the mop.

SECTION 5: PSYCHOLOGICAL PROFILING — SUPPLEMENTARY PROTOCOLS

In addition to the G.O.A.T. framework, all residents undergo an ongoing Passive Psychological Monitoring Program (PPMP) managed by the HR Division. The PPMP is conducted without resident knowledge or consent, which our Legal Team assures us is **perfectly swell** under Vault-Tec Resident Agreement Clause 14, Sub-Section Q ('Comprehensive Wellbeing Oversight'). Residents sign this clause upon vault entry — usually during the excitement of the door closing, when they are least likely to read carefully. Industry-leading onboarding, if we do say so ourselves!

Profile Flag	Behavioral Indicator	HR Action Required
FLAG-A: 'Deep Thinker'	Resident asks questions about vault purpose, existence, and long-term viability	Assign to library and provide supplemental reading. Increase cafeteria security.
FLAG-B: 'Social Agitator'	Resident is observed speaking to more than 4 residents per day about current grievances	Resident's Quarantine about current grievances. Assignment to isolated wing. File Form 88-VF.
FLAG-C: 'Melancholy Assembler'	Resident demonstrates persistent low affect, reduced productivity, or decreased initiative	Assign to productivity wellness initiative. Group B. Monitor for escalation to Tier 5.
FLAG-D: 'Voluntary Realization Risk'	Resident has expressed a desire to leave the vault	Immediate referral to Social Protocols. This is not a drill. File Form 88-VF.

SECTION 6: MANDATORY COMPLIANCE & RECORD-KEEPING

The integrity of the G.O.A.T. Program depends on meticulous administrative discipline. The following forms **MUST** be filed with the HR Records Bureau within the timeframes specified. Failure to comply may result in an audit flag and a mandatory 4-hour training session with Assistant Director Kowalski, which everyone agrees is far worse than any audit. Keep it tidy, sport!

Form Number	Title	Filing Deadline	Copies
GOAT-BURN-076	Incineration of G.O.A.T. Answer Sheets	Within 24 hours of exam 1	(furnace receipt only)
Form 22-A	Assignment Manifest Submission to Central Records	18 months BEFORE exam	3 (triplicate)
Form SUX-77	Social Utility Index Cross-Reference Log	Upon VSNA completion	2
Form 88-D	Resident Re-Evaluation Request (Do Not File)	Upon receipt	1 (Cabinet 7-B)
Form 88-VR	Voluntary Reallocation Risk Report	Within 2 hours of flag	3 (triplicate, urgent)
Form 19-C	Problematic Resident Referral	Within 48 hours of FLAG-B/D	3 (triplicate)
Form PSYCH-ANNUAL	Annual Passive Monitoring Program Summary	December 31, annually	2

A PERSONAL NOTE FROM THE DIRECTOR

We at the Division of Human Asset Calibration want you to know that the G.O.A.T. Program is, and has always been, our proudest accomplishment. Sure, some might say that presenting a scripted, pre-determined outcome as a merit-based evaluation is a touch *misleading*. But we prefer to call it '**Optimized Expectation Architecture**.' And when you see a Tier-4 Agricultural Laborer cheerfully tending to the hydroponic beets, *genuinely believing* they earned that assignment through their own hard work and aptitude — well, that's not deception, sport. That's **data-driven human flourishing**. And it's just about the most swell thing we've ever seen.

Keep up the tip-top work. The data thanks you for it.

Director Winifred Gable-Pruett | Division of Human Asset Calibration | Vault-Tec Corporation HR
