GENERAL EMERGENCY EVACUATION (MOCK) PROCEDURES

Title:	Date:	Department / Role:	Intended Format:
General Emergency Evacuation (Mock) Procedures	September 2076	General Employee	PDF

A Message from Your Vault-Tec Safety Compliance Team!

Greetings, valued Vault Resident! Here at Vault-Tec Corporation, your safety is our **second-highest priority**, right after the integrity of ongoing behavioral and social research initiatives! That is why we are *thrilled* to present this comprehensive guide to Emergency Evacuation Drill Procedures. Please read this document in its entirety, memorize all applicable sections, and return the signed acknowledgment slip to your assigned Floor Monitor within seventy-two (72) hours of receipt. Failure to do so will be logged in your Permanent Resident File.

SECTION 1: PURPOSE AND SCOPE

This Standard Operating Procedure (SOP) establishes the official Vault-Tec protocols for conducting emergency evacuation **drills**. The operative word, residents, is **DRILL**. These procedures exist solely to promote resident wellness through simulated preparedness activities and the cultivation of a healthy, anxiety-responsive community spirit.

This document applies to all residents of Floors B1 through B14. Residents of Floor B15 (Experimental Wing Sigma) are subject to a separate, classified SOP and should disregard this document entirely.

CRITICAL OPERATIONAL NOTICE: THE VAULT DOOR IS NOT AN EXIT. Under no circumstances should any resident interpret an evacuation drill signal as an instruction, suggestion, invitation, or implicit endorsement to physically approach, touch, or otherwise interact with the Vault's primary blast door (Gear Door Assembly No. 76-GD-PRIME). The door exists for your protection. Your protection means staying inside. These two facts are harmonious and should cause you no distress whatsoever.

SECTION 2: DRILL ACTIVATION SIGNALS

Evacuation drills will be announced via the Vault's Public Address (PA) system by a cheerful, pre-recorded message voiced by Vault-Tec's beloved mascot, Vault Boy. Residents should familiarise themselves with the following signal taxonomy:

Signal	Tone	Resident Action Required
DRILL — Level 1	Three short, ascending chimes	Proceed calmly to designated muster station. Do NOT run. Running is undignified and
DRILL — Level 2	One sustained, melodious klaxon (2 seconds)	Assume seated cross-legged position in corridor. Hum assigned Vault hymn to pro
DRILL — Level 3	Rapid alternating tones + cheerful Bounte requivers	Return to quarters immediately. Do not investigate source. Trust the process.
NOT A DRILL*	[REDACTED — SEE ADDENDUM [REDACTED]]	[REDACTED]

** Residents are reminded that a 'NOT A DRILL' scenario is, statistically speaking, essentially impossible, and that Vault-Tec's engineering and diplomatic teams have rendered any genuine emergency a comfortingly remote abstraction.*

SECTION 3: STEP-BY-STEP DRILL PARTICIPATION GUIDE

Please follow these steps in sequential order. Skipping steps is a violation of SOP and will be noted.

- Step 1:** Upon hearing the drill signal, cease all non-essential activities (meal consumption may be paused but must be resumed within a regulation 20-minute window to avoid rationing violations).
- Step 2:** Proceed to your pre-assigned Muster Point as indicated on the color-coded chart affixed to the inside of your quarters door. If your chart is missing, you have likely already been reassigned. Please do not be alarmed.
- Step 3:** Check in with your Floor Monitor. Provide your Resident ID number verbally. Do not whisper. Whispering during drills implies subversive behavior and will be flagged.
- Step 4:** Stand in the designated two-by-two formation and await the All-Clear tone. Smiling is encouraged. Vault-Tec behavioral analysts have determined that residents who smile during drills report 14% higher morale scores in subsequent quarterly surveys.
- Step 5:** Upon All-Clear, return to your pre-drill activity. Congratulate yourself! You have successfully contributed to the collective preparedness of your Vault community, and by extension, to the glorious future of the human species.

SECTION 4: PROHIBITED BEHAVIORS DURING DRILLS

- Approaching the Vault Door under any pretext, including 'curiosity,' 'fresh air,' 'a feeling,' or 'a dream.'
 - Asking Floor Monitors or security personnel what is 'actually outside.' This question has no productive answer and will be redirected to a complimentary counseling session.
 - Sharing, posting, or distributing any personal theories regarding the Vault Door's operational status.
 - Panicking. Panic is expressly prohibited under Vault-Tec Resident Conduct Code 7.4(b) and is considered a wellness violation.
 - Departing the Vault. This item is included for completeness. It has never happened. It will not happen. Everyone is fine.
-
